Understanding statistics on refugee claims by irregular border crosser
Important notes about statistics on irregular border crossers
For the purposes of this report, irregular border crossers are defined as individuals who entered Canada between official ports of entry. Like other refugee protection claimants, irregular border crossers are referred to the Immigration and Refugee Board of Canada's (IRB) Refugee Protection Division (RPD) after Immigration, Refugees, and Citizenship Canada (IRCC) or the Canada Border Services Agency (CBSA) makes a determination of their eligibility.
The IRB is unable to report on irregular border crossers prior to February 2017, when system changes gave us the capacity to capture data on this population. However, due to some early inconsistencies in data entry it is possible that not all irregular border crossers are reflected in the statistics. In addition, only partial data is available for the months of February and March 2017.

Now for something that isn't covered much by mainstream (or alternative) media. Who exactly is coming into Canada illegally, in between official border ports of entry? What are the numbers? Fortunately, the Immigration and Refugee Board has at least some information to share.

**The IRB lists some totals as <20, and they claim that this is done for privacy reasons. The logic seems to be that if there were only a few who crossed, it would be easier to identify them.

The above totals are from February 2017 to December 2021. The IRB claims that it didn't have access to such information prior to this.

Isn't this lovely, that the bulk of the people ILLEGALLY entering Canada are from the 3rd World? But let's be fair, we don't have nearly enough rocket scientists and brain surgeons here already. Keep in mind, these people have entered the United States — at some point — and decided to continue onwards. They've already passed on at least one safe country, one that gets hundreds of thousands of applications per year.

And again, this could be stopped very quickly. However, politicians (of all stripes) actively work against the interests of their own citizens.

And right now, if you check Jihad Watch, you will learn that Nigerian Muslims are the leading slayer of Christians… sometimes hundreds at a time. It’s at jihadwatch.org where you will learn how Muslims have destroyed France, Italy, Egypt and other nations, and this is what is being invited into Canada.

The government lied about the Syrian crisis. I have one document left that shows where in Canada they went but the other two are gone. I only saved them to my reading list not to a file. One showed the nationality and the other was an internel document to whom it may concern of clerical staff. In the memo it stated that staff were not divulge any information in regards to their

age or nationality. In case citizans become alarmed.They were listed as military aged single men from 18 to 45 I believe it was. They were from all over the third world countries, Somalia, Nigeria Zimbabwe. I can’t remember all the countries. I was not into politics very much till the criminal became liberal leader. After going through the pain of the father I knew we were in trouble. I just wish I’d have protected some of the documents a little better, It never ends with him. a person could have a full time job trying to keep up with his corruption
